REPORT  
OF THE  
MANAGING COMMITTEE

---

This annual Report of Barnwood House, for the year 1959, is the one-hundredth issued since the Hospital first opened for the reception of patients in 1860.

The daily average number of patients resident during the year now under review was 146, in comparison with 154 during the previous year.

Of the total number of patients who were resident, 64 patients for the full year, and 18 patients for parts of the year were maintained for fees below the average cost. Of the applications submitted to the Committee for reduction of fees, only one was declined. On the other hand it was again found necessary to make some increases in existing fees in order to relate income from this source to continued rising expenditure.

For full financial information the Governors are referred to the accompanying statement of accounts and the comparative figures of previous years.

No major structural work on the buildings was undertaken. Some preliminary work on the repair of the main roofs begun but halted temporarily by bad weather, will be resumed when conditions are favourable. The new heating installation, begun in 1956, was practically complete by the end of the year. The disturbing noise from the newly-designed rotary oil burners, which caused concern by its persistence, is being eliminated by specially constructed attachments. The cost of all labour and materials amounted at 31st December to £53,659.

The Farm continues to serve well its main objects of supplying the Hospital with fresh produce, and of showing a favourable financial result, so that the Farm Sub-Committee and the Farm Manager are once again to be congratulated. In the Gardens a portable water pumping plant, capable of using water from the brook, was installed and employed extensively during the exceptionally dry summer with excellent results.

The Committee regret to record the death early in the year of Sir Evan Gwynne-Evans, Bart., a Governor since 1941 and a valued member of the Committee until 1951.

The Committee were grateful to learn, from the executors of the mother of a former patient, of a legacy to Barnwood House of between £18,000 and £20,000 (according to death duties) for a fund for research. A part of this sum has already been received.

Dr. W. Ross Ashby, the Director of Research, resigned on 30th April upon being appointed to the Directorship of the Burden Neurological Institute at Bristol. The Committee here record their appreciation of his services during the past twelve years.

Male charge nurse Ernest H. Phelps, and a gardener, Arthur Smith, retired and were granted pensions in accordance with the pension fund rules.

Of staff already pensioned, the Committee regret to record that C. J. Virgo, Sister Maude Mullany, Alice Nicholls and Herbert Meadows, died.

At Hume Towers an extension to provide an additional five bedrooms with bathrooms was planned, and this work was nearly completed by the end of the year. At the same time the decision was taken to put in a lift, to meet a growing need by the patients for this aid. Miss Agnes Popham, the Matron there, whose service the Committee have

specially acknowledged, retired at Easter because of a sudden illness, and was succeeded later in the year by Mrs. C. G. Barnes. Close co-operation exists between this seaside branch and Barnwood House, whose Committee continues to decide any question of policy. For many months negotiations for a sale of some of the woodland forming part of this Bournemouth property have been proceeding, and have recently reached a conclusion on terms considered by the Committee to be eminently satisfactory.

The Committee once more end their Report with an expression of their gratitude and appreciation to their large Staff upon whom rests both the credit for, and the burden of, the smooth and successful operation of the Hospital. To Dr. G. W. T. H. Fleming, the Physician-Superintendent, in a year which has seen the full value of the extension of work to Hume Towers, they wish to pay their tribute for the foresight which he has shown in all his advice upon matters of policy and management, as well as to his skill and care in the treatment of the patients in which they also express their thanks to his Medical Officers. To their Matron, Miss MacMillan, Hume Towers has also brought additional labour and responsibility, especially during the long period of interregnum which followed Miss Popham's sudden illness, at a time when she was very fully occupied at Barnwood House, and the Committee renews to her, and to all her Nursing Staff, their warm appreciation of the high standards of care and maintenance which are sustained. Finally, the Committee are mindful that comfort and efficiency for both Patients and Staff are in so many ways dependent upon the Heads of the several Departments, and upon the Staff working under them, for whose constant service the Committee remain always grateful.

W. I. CROOME,

*Chairman.*

REPORTS  
OF THE  
COMMISSIONERS OF THE BOARD OF CONTROL

---

BARNWOOD HOUSE,  
GLOUCESTER.

25th May, 1959.

I have today paid the first visit of the year to this Registered Hospital, and with the exception of 3 patients who were out, I believe I have seen all those in residence. These number 150—45 gentlemen and 105 ladies. Of the former, 17 and of the latter, 57 are voluntary and the remainder are all detained under certificates. I gave 4 private interviews and had conversations with many of the patients.

During 1958 there were 118 direct admissions, of whom 107 were voluntary, 3 were temporary and 5 were certified. In the same period 95 patients left or were discharged, and 20 patients died; all from natural causes. In only one case was an inquest held, full particulars of which have already been furnished to my Board.

The nursing staff consists of 13 men and 22 women full time, and 2 men and 27 women part-time nurses. Thirteen of the men and 19 of the women are certified or registered mental nurses, but there are only 2 student nurses at present, one of each sex.

The house and grounds are in their usual good order and the various public rooms, dormitories and single bedrooms most comfortably furnished. The process of install-

ing oil fuel for the central heating has now almost been completed. On the ladies side some redecoration has been carried out since the last visit.

In the absence on leave of Dr. Fleming, Dr. Collins and Dr. Taylor have given me every assistance during my interesting visit.

I. COFFIN DUNCAN,  
*Commissioner of the Board of Control.*

---

BARNWOOD HOUSE,  
GLOUCESTER.

29th October, 1959.

Today we paid the second visit of the year to Barnwood House on behalf of the Board of Control.

We visited all the wards, and the two villas, Lynnthorpe and Manor House. We spoke to a number of patients, including all who wished to talk to us. One private interview was given.

The wards were very comfortable and well kept, and although it was quite cold outside the rooms were warm. The general standard of decoration of the rooms is good: in the near future it is intended to bring certain rooms on the men's side (particularly Ward 4) up to this standard. Pictures, curtains and flowers contribute noticeably to the pleasant appearance of the wards everywhere.

Patients in residence today totalled 139. 4 of these had been admitted as informal patients since the amendment of the law permitting this, on 6th October 1959. Of the other 135 (38 gentlemen and 97 ladies) 62 were voluntary patients and 73 certified. 1 patient was away on trial and 2 on leave.

Since 1st January 1959, 88 patients have been admitted direct, and 79 have departed or been discharged. Of those admitted, only 10 out of the 88 were certified patients. During the same period 28 patients died.

The nursing staff consists of 15 men and 44 women. Of the men, 12 are full-time (and one part-time) qualified mental nurses, and one is a student nurse. 10 of the women are full-time (and 7 part-time) qualified mental nurses, and one is a student nurse. The relationship between the patients and the nurses appeared to be very friendly, and the nursing care everywhere was noticeably good. Miss MacMillan is the Matron.

Occupational work includes daily classes, both morning and afternoon, in the centre (mainly for ladies) and some individual work in the wards. There are also daily art and physical training classes. Today it was reported that 51 ladies and 23 gentlemen were usefully employed.

The patients' menu, which is varied each week, provides for an ample and interesting cooked lunch and cooked supper (two courses) every day: and hot drinks are provided at 7.30 p.m. and 10.0 p.m. Breakfast is: Porridge or cereal, toast and marmalade, bread and butter, tea or coffee. We were assured that the breakfast menu satisfied almost all the patients, and that any patient who asked for a cooked breakfast dish was given one without objection or difficulty: we hope that patients may be regularly told of this, in case some (particularly new patients) might be too bashful to ask for a cooked dish.

We should like to thank Dr. Fleming and Miss MacMillan, who gave us every assistance throughout this interesting and pleasant visit.

A. K. Ross,  
S. M. ALLAN,  
*Commissioners of the Board of Control.*

# REPORT OF THE PHYSICIAN SUPERINTENDENT

---

I have the honour to present my report for 1959.

There were in the Hospital on January 1st, 1959, 78 certified patients, 1 temporary patient and 74 voluntary patients.

Seventeen certified patients, no temporary patients, 78 voluntary patients, and 20 informal patients were admitted during the year, a total of 115 compared with 120 in 1958 including transfers but excluding regradings.

One hundred and twenty-seven patients were discharged, transferred or died. Six patients were regraded. These changes left the numbers on the books on the 31st December, 1959, as follows:—

		<i>Male</i>	<i>Female</i>	<i>Total</i>
Certified Patients	...	29	46	75
Temporary Patients	...	—	—	—
Voluntary Patients	...	10	48	58
Informal Patients	...	4	4	8

Two-hundred and sixty-eight patients of the three classes were under treatment during the year as compared with 276 in 1958 and 278 in 1957.

The daily average number of patients on the books during the year was 150 compared with 158 in 1958.

Of the direct admissions during the year, the percentage of voluntary admissions was 71 compared with 91 in 1958, while that of certified patients was 11, compared with

7 in 1958. The percentage of informal admissions on the direct admissions was 18. It ought to be explained that informal patients are those admitted without any formalities as a result of the Mental Health Act of 1959.

#### DISCHARGES

Ninety-four patients left the Hospital during the year. Of these 27 males and 41 females were discharged recovered, that is 60 per cent males and 63 per cent females and 62 per cent of the total direct admissions.

Nineteen patients were discharged relieved and 6 were discharged not improved, either to the care of friends or to other hospitals.

#### DEATHS

There were 33 deaths during the year, 11 male and 22 female, the average age at death being 78. Of the 33 deaths 13 had been in the hospital less than one year. This large number of deaths is largely responsible for the drop in numbers at the end of the year.

The general health both of patients and of staff has been very good during the year.

#### RESEARCH

Since Dr. W. Ross Ashby's departure, the Research department has been closed until such time as we can re-organize it.

#### GENERAL MATTERS

The amount spent on repairs during the year was £9,389, compared with £10,417 in 1958 and £10,782 in 1957. The amount spent on furniture was £1,448 compared with £1,496 in 1958 and £1,676 in 1957.

During 1959 further repair work was carried out, but there is still a vast amount of work from the war and post-war years to be overtaken. It is hoped that in the course of the next few years these arrears will all be overtaken. Some of the work will be done by outside contracting.

#### HUME TOWERS

Our seaside branch in Bournemouth has had another busy year, with 91 admissions. This is a large number considering that there are only forty-three beds. Since it was opened on 25th February 1955, 725 patients have been admitted.

As has happened in the four previous years the length of stay has generally been short. During 1959 of the 91 admissions the length of stay was approximately as follows :—

14 days or less	...	29.3%
Between 15-28 days	...	28%
„ 1-3 months	...	27.4%
3 months or more	...	15.3%

It will be seen that 57.3% stayed for 28 days or less, compared with 57% in 1958. When we turn our attention to the age groups, we find that there were no admissions below the age of 34, and that 40% were between 30 to 60 years of age, 50% between 61 and 80, and 10% over 80.

The clinical type of case was much the same as in the previous years, about a third of the cases being depressions, most of whom required electric-shock treatment.

The average number in residence was 39 compared with 36 in 1958 and with 32 in 1957, the most at any one time being 43, i.e. every bed occupied.

Our thanks are due to Dr. R. W. Armstrong, who took up his duties on the 1st November 1958. He has proved himself a very successful medical officer.

Most unhappily the Matron of Hume Towers, Miss Popham, had a stroke on Easter Day. She had intended retiring in July. Her place was taken by Mrs. Barnes, who came to us with experience in a very large hospital at Darenth, Kent.

We owe a debt of gratitude to Miss Popham, who had been Matron at Hume Towers for twenty-seven years when we bought it. During the four years that she was Matron under our tenure she proved herself a loyal and devoted servant of the Committee. She was a very hard worker and never spared herself.

It is hoped to occupy the five new rooms early in the New Year. They promise to be a very great asset, and greatly improve the southern aspect of the house.

It is a pleasure to express my appreciation of the assistance I have received during the year from the Medical Officers, the Matron, the Secretary, the Clerk of Works, and all members of the staff.

I am very grateful to the Chairman, particularly for his ever willing advice and support in the negotiations for the sale of four acres of land at Hume Towers, and to the Committee for their renewed support during the year.

G. W. T. H. FLEMING,  
*Physician Superintendent.*
